## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Amendment***

The examiner is in receipt of applicant's response to office action mailed 4/28/2005, which was received 7/28/2005. Acknowledgement is made to the amendment to claims 1,2,4-9 and the amendment to the specification. The specification amendment was effective in overcoming the USC 112 rejection, however after consideration of the claim amendments a restriction is in order AND IS PROVIDED BELOW:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,2,4-7, drawn to a method for selling telecommunications involving the accessing of information including the further limitation "wherein the request is received after the information associated with one or more of a plurality of service providers", classified in class 705, subclass 26.
- II. Claim 8, drawn to a system for provisioning telecommunications service including receiving acceptance to the response during the session and preventing acceptance to the response after the session, classified in class 705, subclass 26.

- III. Claim 9, drawn to a method for purchasing telecommunications services during a session, including preventing the modifying of the set of responses during the session, classified in class 705, subclass 26.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as selling telecommunications involving the accessing of information including the further limitation "wherein the request is received after the information associated with one or more of a plurality of service providers". See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as selling telecommunications involving the accessing of information including the further limitation "wherein the request is received after the information associated with one or more of a plurality of service providers". See MPEP § 806.05(d).

Art Unit: 3625

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as preventing the modifying of the set of responses during the session. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group IA – 1,2

Group IB – 1,4

Group IC – 1,5

Group ID – 1,6

Group IE – 1,7

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1,8 and 9 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
